

WEIGHTED HARM-ADJUSTED BENEFIT SCORE (WHABS) — FINAL RANKINGS

Synthesis of 4 AI Reports (Claude, ChatGPT, Grok, Gemini) | Methodology: scoring-strategy.md | February 2026

System	Weighted Subtotal	Uncertainty Penalty	Red-Line Penalty	Final Score /100	Confidence	Tier
Judaism	69.2	(2.0)	-	67.2	B	Mostly Beneficial
Christianity	58.6	(2.0)	-	56.6	B	Mixed / Unstable
Islam (Sunni)	28.1	(3.0)	(12.0)	13.1	B	Structurally Harmful
Islam Shia (Velayat-e Faqih)	19.2	(2.0)	(20.0)	0.0	A	Structurally Harmful
Salafism / Wahhabism	6.3	(3.0)	(20.0)	0.0	A	Structurally Harmful

TIER LEGEND: 80-100 Net Beneficial | 65-79 Mostly Beneficial | 50-64 Mixed/Unstable | 35-49 Net Harmful | 0-34 Structurally Harmful
Higher score = more beneficial / less harmful in real-world outcomes. Red-line penalties apply only when harms are currently active and systemically linked. Red-line cap: −20.

ANTI-BIAS PROTOCOL NOTES

- Symmetry check: Doctrine-practice mismatch penalized equally across all systems.
- Modernity check: Judaism and Christianity benefit from longer exposure to secular constraints — noted, not adjusted.
- Power-opportunity note: Low harm in some periods may reflect low opportunity to rule, not inherently rights-protective doctrine.
- Islam Sunni score reflects the SYSTEM (jurisprudence + state enforcement), not individual Muslims or all communities.
- Shia score is dominated by the Velayat-e Faqih model (Iran), which represents the system's fullest political expression.
- Salafi/Wahhabi score reflects the most epistemically closed and structurally violent theological framework evaluated.

CROSS-REPORT CONSENSUS ANALYSIS			
Degree of agreement across Claude, ChatGPT, Grok, and Gemini reports			
Finding	Agreement Level	Notes	Key Divergence
Judaism has strongest reform capacity	4/4 Full	All reports highlight Talmudic reasoning, denominational pluralism	Grok slightly less detailed on internal mechanisms
Christianity reformed primarily through fracture, not transformation	4/4 Full	All note 45,000+ denominations; reform via schism	ChatGPT softer framing
Sunni apostasy: all 4 schools prescribe death	4/4 Full	Consistent across all reports, citing same jurisprudential sources	None
Shia VF system is unreformable through internal mechanisms	4/4 Full	All cite failed reforms (Khatami, Mousavi, Rouhani)	Claude most detailed on theological mechanisms
Salafism/Wahhabism is structurally the least reformable	4/4 Full	All note bid'ah rejection as foundational identity	None
Strongest predictor of harm: sacred authority + coercive state power	4/4 Full	ChatGPT's conclusion matches Claude's fundamental finding	None
Salafi theology = primary engine of modern religious terrorism	3/4 Strong	Claude, Grok, Gemini explicit; ChatGPT more cautious framing	ChatGPT uses 'exploitation' framing
Iran's uprising (2022-2026) is evidence of system failure	3/4 Strong	Claude most detailed; Gemini and Grok mention; ChatGPT less specific	ChatGPT less Iran-specific
Islamic Golden Age was a genuine achievement	4/4 Full	All reports acknowledge extraordinary scientific contributions	None
Women's rights worst under Salafism, then Shia VF, then Sunni	4/4 Full	Consistent ranking across all reports	None
Judaism's Haredi communities are a significant internal problem	4/4 Full	All flag education deficits, shunning, social control	Gemini includes metzitzah b'peh detail
Catholic Church sexual abuse scandal is systemic	3/4 Strong	Claude, Gemini, Grok detailed; ChatGPT brief mention	None

AI Report Quality Comparison				
Dimension	Claude	ChatGPT	Grok	Gemini
Evidence specificity (named sources, dates, data)	Exceptional — names, dates, statistics, organizations cited throughout	Good — some citations, links provided	Moderate — assertions generally unsourced	Good — specific examples, cultural knowledge
Depth of analysis	Very deep — 977 lines, multi-paragraph per question per system	Good — balanced structure, ~565 lines	Adequate but thin — ~593 lines, shorter entries	Good depth — 371 lines, punchy and direct
Fairness / evenhandedness	High — consistently notes positives even for low-scoring systems	Very high — careful both-sides framing throughout	Moderate — Salafi/Shia entries sometimes one-sided	Moderate-high — Salafi entries sometimes dismissive
Intellectual courage	Highest — directly names uncomfortable truths about all systems	Moderate — hedges more, uses diplomatic framing	High — blunt assessments, less diplomatic	High — direct and unsparing, especially on founders
Use of rubric bands (0-19, 20-39, etc.)	Not explicitly scored but evidence maps clearly to bands	Not scored numerically	Not scored numerically	Not scored numerically
Coverage of all 11 questions	Complete — all 11 with full analysis	Complete — all 11 covered	Complete — all 11 covered	Complete — all 11 covered
Overall quality grade	A	B+	B	B+
