AUDIT INTEGRITY & ANTI-BIAS PROTOCOL

✓ **SYMMETRY CHECK**

Historical Christian violence (Crusades) weighed against modern Islamic violence.

✓ **MODERNITY CHECK**

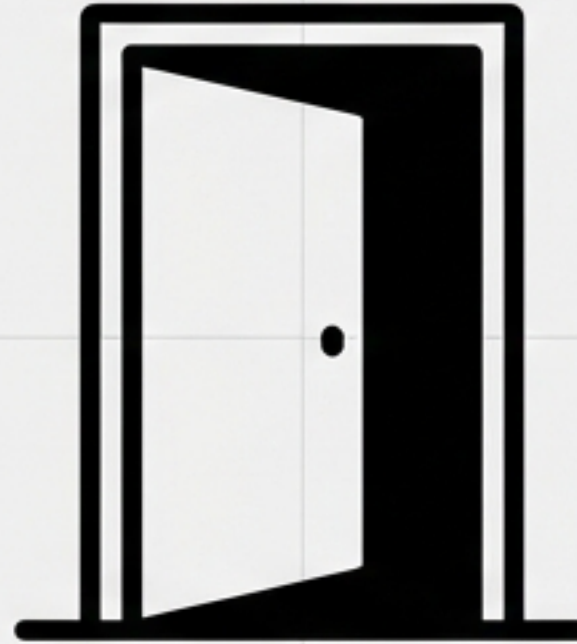

Scores reflect that Judaism/Christianity have had longer exposure to secular constraints.

✓ **POWER-OPPORTUNITY CHECK**

Noted that low harm sometimes reflects low opportunity to rule.

THE STRONGEST PREDICTOR OF HARM IS NOT THE LABEL OF THE FAITH,
BUT THE ABSENCE OF A SECULAR CHECK ON ITS POWER.

FINAL VERDICT: THE MEASURE IS THE OUTCOME.

“The measure of a belief system is
not its poetry but its prisons.”

CONCLUSION: Belief systems are safest when they operate within a marketplace of ideas, and most dangerous when they become the law.
